

# DeepVision

## Specification

<b>Weight in air</b>	9.0kg
<b>Weight in water</b>	6.7kg
<b>Length</b>	850mm
<b>Diameter</b>	50mm
<b>Material</b>	stainless steel, poyuretan & pom
<b>Max depth</b>	100m

## Available frequencies is

200kHz  
340kHz  
680kHz  
680kHz SAR  
And combinations of these

## DeepEye Towfish

DeepEye towfish is our medium-sized towfish. It is small enough to be incredibly portable and easy to use, but still large enough to provide very good images at depths between 0-60m. It is well suited for use with both winch systems as well as manual cable drums. It is available in different versions with different frequencies depending on the intended area of application. It is the most common choice when it comes to cable positioning, body search, mine search, but is also used for biological inventory of e.g. seaweed etc.
